

jFork Technology Services

AI ENABLED ACADEMIC AND ADMINISTRATIVE
PROCESS AUTOMATION OF HIGHER EDUCATION
INSTITUTES

Introduction about the Company

- jFork Technology Services (As per Incorporation only)
- www.jforkts.in
- Date (08/08/2022) of Incorporation (CIN)/ Registration
- Sunil F. Rodd, Shrinivas Mangalwede, Shrinivas Dhotre/ Director (s)

#	Name (As per the RoC or Partnership Deed)	DIN Number (In case of RoC Company)	No of Shares
	Sunil F. Rodd	0009699358	33.33%
	Shrinivas Mangalwede	0009699359	33.33%
	Shrinivas Dhotre	0009699360	33.33%

Problem Statement

- In the current higher education system, the faculty is over-burdened with too many tasks, apart from teaching and research. Most of the time is wasted in documentation and repetitive work. We intend to provide a Complete automation of administrative and academic processes in an educational institute(an Engineering institute in particular). Further, the students need proper guidance so as to prepare them well for campus placements and higher studies. The students will be provided with an AI based recommendation system to prepare them well for semester end exams, competitive exams as well as campus placements. This system will enhance the efficiency of the faculty and also suggest appropriate learning paths for students improve their chance of campus placements.

To automate the academic and admirative processes and using data analytics and AI enhance the overall productivity and quality of education system.

Product/ Solution - Innovation

- The unified approach gives the faculty, HoDs, Placement officer, Purchase committee, Principal and Management to coordinate every aspect of carrying out the day to day activities in an effortless way.
- We feel its first of kind as we have in knowledge of few ERP products in the domain, that provide only solution to certain aspects of managing day-to-day activities in an educational institute.
- The product is unique in a sense, it not only eases the burden on the faculty, but also helps immensely to meet the requirements of NBA and other accreditation bodies.
- We also wish to explore the use of AI to suggest to HoDs, Placement officer, Principal and Management to point out what are the problem areas and with an AI expert suggestions.
- The students especially who come from rural background, get an AI based recommendation system that provides guidance on, what online courses to enroll for, how to sharpen their technical as well as general aptitude.
- Further, the system can identify academically weak students and predict who is likely to fail in end semester exam based on their internal test performance. Thus these students could be given tutorial classes and thus improve the class pass percentage

Product/ Solution - Readiness Level

The product is at early stage of implementation, with academic module, leave management, course documentation and department admin modules implemented.

- Working Prototype/Proof of Concept

Socio-Economic Impact of the Project

- First of all it will eliminate lot of paper work and thus reduce the burden on the environment
- Yes, it has immense potential of job creation as the number of customers grow, as we need to provide customer support 24*7
- It will bigger impact on Society as students well trained by faculty would ample opportunities to find jobs and prepare well as they get tips on how to prepare for interview and what skill-sets are expected etc.

Market Landscape - Market Potential, Competitors

- 1-5 Crores (Revenue) of the market which you are addressing
- 10 to 15 Educational Institutes in and around Belgavi with 2000-5000 students in each institute. There is a potential for this product to be adopted by most of these institutions.

Competitors - DHI, Contineo. RoboVidya – Offer very basic management services and very expensive. Very limited features.

Our key USPs :

- Our predict will offer immense value at very competitive price
- Wide range of services from a single platform
- Data analytics and AI based recommendation system

Revenue Model - Pricing and Revenue Forecast across years and how it will grow.

Per-Student Rs. 500/year * 1000 students = 5 lakh + GST

Hosting and Maintenance Charges Rs. 3 lakhs per year + GST

Total cost of the product would be – 8 lakhs /year + GST

Business Model

- B2C (Retailing, Franchising, B2B, B2C etc)

Project Milestones

- What will be done at the end of the project?
